DETAILED ACTION

Response to Amendment

1. The amendment, declaration, and remarks, filed July 23, 2007, are noted with appreciation.
2. Claims 1-13 and 16-21 remain pending.

Response to Arguments

3. Applicant's arguments filed July 23, 2007, have been fully considered but they are not persuasive.

A. Applicant is arguing the criticality of the claimed curing time and temperature scheme, and has filed a declaration to this effect. Applicant is reminded that the unexpected results demonstrated must be commensurate in scope with the claimed subject matter. See MPEP 716.02(d). Both the specification examples and the declaration examples show curing at 60°C for 10 min., which is not commensurate in scope with the entire claimed range of 60-70°C and 10-25 min. As such, neither the argument nor the declaration weight against the *prima facie* case of record.

B. Further, the independent claim has been amended to recite a tackiness-free film. As noted in the prior Office action, temp/time curing scheme is readily optimized by one skilled in the art to achieve the desired curing which includes a finished, tack-free film.

Claim Rejections - 35 USC § 103

Art Unit: 1792

4. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claims 1, 3-13, and 16-19, are rejected under 35 U.S.C. 103(a) as being unpatentable over Rink et al. (US 6,013,739 A) in view of Marutani et al. (US 6,040,009 A) and Ido et al. (US 2002/0013398 A1).

A. These references are applied herein again as set forth under this heading in the prior Office action.

B. The claims, as amended, remain obvious as explained above.

7. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Rink et al., Marutani et al., and Ido et al., as applied to claim 1 above, and further in view of Asahina et al. (US 5,817,732 A) and Croft (US 5,688,860 A).

A. These references are applied herein again as set forth under this heading in the prior Office action.

B. The claims, as amended, remain obvious as explained above.

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

9. The prompt development of clear issues in the prosecution history requires that applicant's reply to this Office action be fully responsive (MPEP § 714.02). When filing an amendment, applicant should specifically point out the support for any amendment made to the disclosure, including new or amended claims (MPEP §§ 714.02 & 2163). A fully responsive reply to this Office action, if it includes new or amended claims, must therefore include an explicit citation (i.e., page number and line number) of that/those portion(s) of the original disclosure which applicant contends support(s) the new or amended limitation(s).
